

The gig driver's road kit.

For delivery and rideshare drivers whose office is the front seat: twelve things that make a long shift easier and safer.

1 A solid phone mount

- Mounted where you glance, never in your lap
- Set the route before the car moves
- No texting while driving, even at lights

2 Power all shift

- A fast car charger and a spare cable
- A charged power bank for long walks to doors
- Low-power mode when the battery dips

3 Water and real food

- In heat, about a cup every 15 to 20 minutes
- Skip high-caffeine and sugary drinks
- Regular meals usually cover your salt needs

4 Sun protection

- SPF 30 or higher, again every 2 hours
- Wide-brim hat and UV-blocking sunglasses
- Strongest sun: 10 a.m. to 4 p.m.

5 Know the heat signs

- Headache, dizzy, nauseous or weak: stop
- AC on, sip water, loosen clothing
- Confused or passing out: call 911

6 First aid kit

- Bandages, gauze, tape, pain reliever
- Blister pads for a day of walking to doors
- Your own medicine in the cabin, not the trunk

7 Jump pack

- Starts the car with no second car
- Doubles as a phone charger
- Save the app's roadside help number

8 Tire gauge and inflator

- Check before the first trip, tires cold
- Use the door-edge label, not the tire
- A 12-volt inflator for slow leaks

9 Cleaning supplies

- Wipes, paper towels and trash bags
- Hand sanitizer between orders
- A towel for spills before the next rider

10 Park in the light

- Lit, open spots near the entrance
- Look around before you step out
- Doors locked while you wait for orders

11 Share your trip

- Live location to someone you trust
- DoorDash SafeDash allows up to 5 contacts
- Know where the in-app 911 button is

12 Trust your instincts

- Confirm the rider's name before you leave
- You can cancel or end a ride that feels wrong
- Leave first, report it after

The car is your office. Stock it like one.
